■ Message from the president

~Techno Labo Co. , Ltd. provides optimal solution for customer's request. ~

Since it has been founding in 1993, Techno Lab Co., Ltd. has provided services that contribute to social improving through computer system development.

So far, we have accumulated a lot of experience and achievements in the field of mobile phone development solution, embedded software development, software development available for core business.

In addition, in recent years, we focus on development of embedded software for onboard equipment and are also working on areas of software conformity test such as debugging.

In order to play a part as a provider of "cloud service", we also work on expand our business area to develop cloud services mainly for integrated administrative solutions.

From now on, we continue to challenge further evolution so that we can utilize diverse development experience to meet customer expectations.

We look forward to your continued support and encouragement in the future.

■Solution

◆Si business◆

◇Local government related system development
We help improve residents' services by proposing optimal cloud service solutions tailored to the situation of each municipality.

◇Resident support

We are constantly staying at customers and offer high value added services from upstream process to operation.

◇System operation maintenance

We maintain and manage system that provides various services so that we can continue to provide services without stopping.

◇Infrastructure system

We design and construct a network use environment, design and build a teleworking environment, verify and maintain two-factor authentication, propose and introduce M2M system.

◆Software conformance test◆

◇Software conformance test

We evaluate the quality by conformity test of onboard equipment, multifunction machine and smartphone application.

◆Embedded software development◆

◇Development of onboard equipment

We develop various control devices for equipment such as car navigation and car audio.

◇Smartphone application development

We proceed with development of applications that can respond to diverse lineup of communication carriers.

◇Map data development for car navigation system

We are good at developing and maintaining map data used in car navigation system. At the moment, we are also working on making use of technology and method of map development for the next generation high accuracy map, "Map ADAS".
